

LES JARDINS DE LA PINÈDE

AVIGNON, FRANCE

"Not far from the exciting city of Avignon, this small complex of apartments has prioritised ecology and a good quality of life.
A success story."

Jean-Jacques Ballester, CEO Equilis France

Bioclimatic Architecture

In a wooded area

Future-proof housing

The stunning region of Avignon has grown significantly in recent years, and no wonder : its climate, natural beauty and geographic location, coupled with its cultural reputation has led to a marked increase in urban development projects.

The new housing complex, Les Jardins de la Pinède, with 47 apartments and 6 villas, offers sustainable living for the future. It is located in the Agroparc, a new high-tech and high added value district with more than 450 companies and 10,000 employees, and is surrounded by forests and countryside.

Each unit has a terrace or garden, is sound proofed and built from high-end materials.

With its south-facing orientation, Les Jardins de la Pinède makes full use of natural light, a design known as bioclimatic architecture. The goal, achieved of course, was to deliver sustainable, future-proof housing and the RT 2012 label.
